

Trova l'equazione della circonferenza che passa per i punti $A(0; -1)$ e $B(-3; 0)$ e ha il centro C sulla retta di equazione $6x - y + 4 = 0$. Traccia per il punto D di intersezione della circonferenza con il semiasse positivo delle x la corda DE parallela all'asse y e trova le equazioni delle tangenti in D e in E alla circonferenza che si intersecano in F . Calcola l'area del quadrilatero $CDFE$.
